Claims 1 to 37 are pending in the instant application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 14 and 16 to 22, drawn to an isolated nucleic acid, classified in class 536, subclass 23.5.
- II. Claims 15 and 31 to 37, drawn to a membrane preparation comprising a specific protein, classified in class 530, subclass 350.
- III. Claims 23 to 29, drawn to a biospecific binding assay, classified in class 436, subclass 501.
- IV. Claim 30, drawn to an "agent" of unspecified constitution, classification undeterminable.

The inventions are distinct, each from the other because:

The nucleic acid of invention I, the protein that defines the membrane preparation of invention II, and the "agent" of invention IV are three chemically and structurally unrelated compounds each of which can be made and used without the others. These three different chemical compounds lack unity of invention because they lack a common utility that is based upon a common feature or combination of features lacking from the prior art.

Inventions I and II are each related to invention III as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the

Art Unit: 1646

assay, as claimed, can be practice with materially different products such as a recombinant cell, a membrane preparation from a source that naturally expresses a channel protein of the instant invention, or an intact cell that naturally expresses that channel protein.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Ulm whose telephone number is (571) 272-0880. The examiner can normally be reached on 9:00AM to 5:30PM.
